Forecast for Sunday 24 Nov 2024

Weather: Heavy rain at times overnight with some localised flooding possible. Outbreaks of rain continuing during the morning with some heavier bursts. The rain will ease a little in the afternoon and some drier spells are possible especially for western hills. Rain turning to isolated showers later in the day. Strong southwesterly winds will continue with gales possible during the morning.

Chance of cloud-free hill tops above 600m: 40%, best chance in the afternoon in the west.

Low cloud and visibility: Layers of broken low cloud at first in the morning above 300m, these will lift and some breaks in the cloud will develop in the west in the afternoon but cloud remaining extensive until mid afternoon further east. Poor visibility expected widely but visibility will improve later in the day in the west.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Turning colder again later in the day but freezing level above all summits. Winds gradually easing but still very blowy with difficult conditions on the summits. Persistent rain may cause localised flooding and watercourses may be quite full on Sunday.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
15:00 on Sat 23 Nov 2024	46.6mm	47.6mm	49.6mm

Forecast for Monday 25 Nov 2024

Weather: Remaining windy and turning cooler. Showery conditions on Monday. Some bright or sunny spells developing but feeling very cold in strong westerly winds, summit gales.

Maximum wind: Southwesterly 25mph gusts 30-35mph

Chance of cloud-free hill tops above 600m: 90% most summits clear.

Low cloud and visibility: Cloud should mostly remain above summits but in any heavier showers, layers of cloud around the summit may develop.

Temperature: **Valleys:** Plus 8 falling to 5 Celsius.
At 600m: Plus 5 falling to 2 Celsius.
Freezing level: 1000m
